

STATISTICS

The programmes under this sector aim at strengthening and improving the existing statistical system so as to enable it to address the critical problems confronting the official data and information system such as filling up data gaps, improving the quality of data produced collected and its dissemination and the timely release of publications. It is proposed to strengthening the computing resources of the Directorate and establishment of a state computer network for data communication and data dissemination and to develop a digital library at this Directorate. The idea is to collect the qualitative data from the field level / grass root level without much time lag and use the same for the developmental needs of various sectors of the Pondicherry economy. The National Statistical Commission also recommends for improvement of co-ordination of activities with the states by empowering the State Directorate of Economics and Statistics and by strengthening the role of the Directorate. The State Directorate of Economics and Statistics should co-ordinate all statistical activities by empowering them to take a technical review of the statistical activities of all departments every year and submit a report to the Government of its comments on and suggestions of these activities. The commission also recommends that the State Government should closely involve the Directorate of Economics and Statistics in its decision making process in substantiate field.
