

STATISTICS

The Scheme Modernisation of Statistical System aims at strengthening and improving the existing statistical system so as to enable it to address the critical problems confronting the official data and information system such as filling up of data gaps, improving the quality of data produced/collected and its dissemination and the timely release of Publications. The "Management Information System" envisages strengthening of the computing resources of the Directorate and establishment of a state computer network for data communication and data dissemination and to develop a digital library at this Directorate. The idea is to collect the qualitative data from the field level / grass root level without much time lag and use the same for the developmental needs of various sectors of the Pondicherry economy.

The important programmes proposed in the Annual Plan 2006-07 are conduct of cost of cultivation studies on paddy crop, Conduct of Survey on unorganised Labourer with special reference to construction labourers in the U.T. of Pondicherry, Conduct of study on the industrial units engaged in the software production in the U.T. of Pondicherry, Training programme on data collection for Index number of Industrial Production(IIP), A familiarisation programme regarding IIP data collection with entrepreneur, Preparation of Pondicherry Statistical Atlas, Collection of Basic Statistics for Decentralised Development Planning and Undertaking survey on residual units of Annual Survey of Industries;
