

ROADS AND BRIDGES

The objective of this sector is to strengthen / standardize the road profile and to improve the riding surface, as per IRC standards, to increase the pavement width and to take up construction / reconstruction of road culverts, bridges, Road Over Bridges, subways, etc., to construct upgrade and strengthen the existing roads and widening roads under the different categories of roads namely National Highways, State Highways, District Roads and Rural Roads.

At the time of merger of Puducherry with the Indian Union in the year 1954, the total length of road network was in the order of 232 km with nearly two thirds of it unsurfaced. Rural areas did not have connectivity to the main roads. Due to successive five year plans, today all the 11 towns and 264 villages in the Union Territory are connected by a road network of total length 2292 km. Out of this, 601 km are PWD roads, all surfaced. The remaining 1691 km comes under local bodies of which 1231 km is surfaced and 460 km are unsurfaced.

All the towns and villages in the Union Territory of Puducherry are well connected by roads coming under categories of National highways, state highways, District Roads and Rural roads. However, due to rapid urbanization, colonization and industrialization the traffic intensity has increased manifold resulting in traffic congestion, poor road/pedestrian safety, strain on public services, stress on road stability, overall degradation of road environment. Therefore, there is a need to upgrade and strengthen the existing roads to IRC standards in a comprehensive manner including widening (single lane to intermediate lane, intermediate lane to double lane and double lane to four lane), strengthening and standardizing the road pavements and junction geometrics, construction/reconstruction of bridges and culverts etc. The major works proposed under 11th Five Year Plan are Upgradation of State Highways, District Roads and Rural roads, Construction/reconstruction of major bridges, construction / reconstruction of minor bridges, reconstruction of age old culverts, construction of road side platforms and drains, construction of a Road Over Bridges, flyovers and subways at various places, acquisition of land for road widening at various places, purchase of machinery & equipments required for maintenance cells etc.

Construction of flyovers, subways at important junctions will be taken up for smooth traffic flow. For laying of four-lane road between Puducherry and Tindivanam like Tindivanam to Chennai and for declaring Karaikal – Kumbakonam road as National Highway, Government of India will be approached.

Under Local Administration department the following schemes are implemented for the development / improvement of Rural / Urban Roads.

- Grant for Panchayat Rural Roads and Local Development works.
- Grant to Municipalities for improvement of Roads and Local Development works.

It is proposed to connect the villages and habitations with link roads for which provision has been made.

It is also proposed to provide concrete roads in town limits of the regions of this Union Territory since Puducherry is a Tourism spot of French Culture, tourists from other parts of the country as well as from abroad are visiting this town.
