

## STATISTICS

During the Twelfth Five Year Plan, it has been proposed to revamp the statistical system in the Union Territory of Puducherry on the lines of the recommendations of the National Statistical Commission and also on the pattern of Central Statistical Office, Ministry of Statistics and Programme Implementation, Government of India. Since the Central Government has entrusted the job of Programme Implementation to the Ministry of Statistics, it is proposed to revamp the statistical system in the Union Territory of Puducherry under which the following four components are prepared for the Twelfth Five Year Plan.

- Strengthening of State Income unit for estimate District Domestic Product and also quarterly monitoring of Economy in Puducherry
- Strengthening of Industrial Statistics Unit for compilation of Index of Industrial production.
- Strengthening of Evaluation and Economic Survey unit for conducting concurrent and ad-hoc surveys on MP (LAD), MLA (LAD) and so on.
- Creation of Research and Analysis Wing.

It has been envisaged in the guidelines of XII Five Year Plan proposals, a vision document in each district has to be prepared which would be entrusted with three aspects of the development viz. Human Development Indicators, Infrastructure Development and Development in the Productive Sector. For preparation of vision document, basic data on demography, tertiary sector and industrial sector are absolutely essential for which strengthening of industrial statistics unit, evaluation unit and economic survey unit is absolutely essential. Without creation of necessary human resources, the task could not be accomplished.

It is also envisaged in the draft guidelines that a stock taking exercise for district level needs to be undertaken. Preparing and maintaining database would be invaluable resource for these stock taking exercises. Data has to be compiled in Electronic mode right from Gram Panchayat level. Unless data are made available, stock taking exercises will not be fruitful.

Further, it is also stressed that HDR reports should be prepared distinctively for which data right from the Commune Panchayat level is essential. Hence in the Twelfth Five Year Plan, it is proposed to create statistical Cells in all commune Panchayats and Municipalities

and statistical personnel will be appointed down to the level of Panchayats in the Union Territory of Puducherry.

The guidelines with respect to District Plans spell out clearly about undertaking participative citizen surveys, it also envisages that data collection is a process, not an event and data will be continuously refined. For this purpose, strengthening of survey unit in the Twelfth Five Year Plan is proposed. Further this unit will also take all socio-economic surveys including pre-budget economic surveys. All IT tools will be modernized for maintenance of database. Hence, it is proposed to modernize the Directorate of Economics and Statistics with latest IT tools for maintenance of data base and for achieving good governance.

It is also proposed to modernize the Directorate under the Centrally Sponsored Scheme through CSO, Ministry of Statistics and Programme Implementation under the ISSP scheme. In this connection, the MoSPI, GOI has agreed to release an amount of ₹7.95 Crore for Strengthening of Infrastructure and other Statistical Strengthening Projects. As per the Letter of Participation signed, between Govt. of Puducherry and MoSPI, GOI, land for the building has to be borne by the State Government. It is proposed, to purchase around 7,000 Sq. Ft. of land from Puducherry Distilleries Limited as outright purchase. Hence, an amount of ₹2.5 Crore has been sought for. Planning Commission, Govt. of India suggests that Evaluation is essential for successful implementation of Plan schemes. It is proposed to totally revamp the evaluation cell.

Industrial sector is contributing a major share in the State Domestic Product. Secondary Sector accounts for about 40% of the share in SDP of Union Territory of Puducherry. A full pledged Industrial Statistics cell is proposed to be created in the 12<sup>th</sup> Five Year Plan so as to collect data on industries.
